DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10, 11, 16, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamazaki et al. (US 6,641,933). Yamazaki et al. discloses EL devices comprising ionic impurities such as sodium in an amount of 0.1 ppm or lower (see claims 4 and 5, col. 23). Preferable compounds for the EL layer include quinol compound Alq3 and phenylamino compound amino-substituted DSA (see col. 3, lines 14-21). The devices may further comprise charge transporting electron transport layers and hole transport layers with regard to claims 11 and 17 (see col. 20, lines 1-4).

Allowable Subject Matter

3. Claims 1-9 and 12-15 are allowed. The prior art fails to teach organic electroluminescent devices comprising copper atoms, iron atoms, aluminum atoms and nickel atoms in an organic layer in the amounts claimed.
